

Sustainable Aviation Research Society (SARES)

AWARD REGULATIONS

Lifetime Achievement – Science – Service – Young Scientist – Company

Awards

General

Article 1

The **Sustainable Aviation Research Society (SARES)** (www.sares.org) will give awards to scientists and researchers who work in the sustainable aviation sphere and document their research, innovation, commercialization and implementation of services to strengthen their work and train scientists and practitioners with the aim of encouraging the demonstration of purpose. Awards will be given in the following categories:

1. Organizing Committee Lifetime Achievement Award
2. Science Award
3. Service Award
4. Young Scientist Award
5. Company Award

Awards will be given every year in the International Symposium on Sustainable Aviation - ISSA. (www.issasci.org)

Definitions

Article 2

Organizing Committee Lifetime Achievement Award:

This award will be given by the Organizing Committee to scientists or practitioners who work on Sustainable Aviation themes in consideration of their contribution to this area. This award will be given to a selected person or persons during the Symposium determined by the Organizing Committee, and award winners can make a speech on a topic they want.

Science Award:

This award will be given to scientists whose scientific studies on issues of sustainable aviation have contributed significantly at the international level. The selection will be based on the applicant's or nominee's articles, h index, project issues and project outcomes.

Service Award:

The Service Award will be given to those who have contributed their research potential to the sustainable aviation area, significantly contributed to technological and economic development, and performed investigations transferred into the industry, contributed to efficiency and sustainability, made important contributions related to sustainable aviation. Applicants or nominees of this award must be 50 years old or older on the application date.

Young Scientist Award:

This award will be given to scientists who have made a difference in one of the issues pertaining to Sustainable aviation at the international level or who have made important contributions to future science on one of the issues related to Sustainable aviation at the international level and proved that he has high research qualities. Applicants or nominees of this award must be 40 years old or younger on the application date.

Company Award:

The Company Awards will be given to companies which operate in the aerospace sphere in two classes: SME (Small and medium-sized enterprises) and Large Business companies. The company which wants to apply for the SME class award should have the SME status. The SME class award will be given to companies which developed products, system or technology in the aviation sector. The Large Business Award will be given to companies according to the work they have done within the scope of sustainability.

Young Researcher Award:

This award will be given to scientists who have made a difference in one of the issues pertaining to Sustainable aviation at the international level or who have made important contributions to future science on one of the issues related to Sustainable aviation at the international level and proved that he has high research qualities. Applicants or nominees of this award must be 30 years old or younger on the application date.

Article 3

Award categories will be determined by the **Sustainable Aviation Research Society** and will be announced 4 months before the Symposium to relevant institutions. Companies can apply for the Company Award themselves.

Article 4

The candidates themselves, nominated by the institutions or organizations, and scientists receiving one of these awards, can make an application to the awards except for “The Organizing Committee Lifetime Achievement Award”.

Article 5

Nominations can be delivered by e-mail to the **Sustainable Aviation Research Society** 2 months before the date of the Symposium.
